VINAY KUMAR

Senior Software Engineer

Gurugram, Haryana, India | 9084644985 | vinaychauhan.22@outlook.com | LinkedIn

PROFESSIONAL SUMMARY

Senior Software Engineer with strong experience designing, developing, and deploying scalable enterprise applications using .NET Core, C#, ASP.NET MVC, Angular, and SQL Server. Experienced in AI-augmented development workflows using GitHub Copilot, Claude Code, and Model Context Protocol (MCP) integrations to accelerate delivery and maintain high engineering standards. Expertise in building RESTful APIs, microservices architecture, event-driven systems (Kafka, Azure Service Bus), and cloud-based solutions on AWS and Azure. Proficient in performance optimization, system design, and implementing secure authentication mechanisms including JWT and SSO. Experienced with CI/CD pipelines, code quality practices, and application monitoring to build reliable, scalable, and high-performance systems.

SKILLS

Languages: C#, JavaScript, TypeScript, SQL, LINQ

Frameworks: .NET Core, ASP.NET MVC, Web API, Entity Framework Core, Dapper

Frontend: React.js, Angular 16/18, HTML, CSS, jQuery, AJAX

Databases: SQL Server, MongoDB, PostgreSQL

Cloud & DevOps: AWS, Azure (App Services, Functions), Docker, GitLab CI/CD, Azure DevOps

Messaging & Streaming: Kafka, Azure Service Bus, Event-Driven Architecture

Testing: Unit Testing, Integration Testing, xUnit, NUnit, Moq, Test-Driven Development

Tools: Git, SonarQube, Consul, Vault, K6, Visual Studio

Monitoring: Grafana, Kibana, Splunk

Concepts: REST APIs, Microservices, Distributed Systems, Clean Code, Design Patterns, SOLID Principles, Dependency Injection, Async/Await, JWT Authentication, SSO, Agile/Scrum, Root Cause Analysis, Mentoring & Coaching, Performance Optimization

AI Tools: GitHub Copilot, Claude Code, Model Context Protocol

EXPERIENCE

Senior Software Engineer, Giesecke+Devrient, Gurugram — *Feb 2026 - Present*

- Developing a .NET 8.0 Web API backend for an enterprise asset management system serving banking clients across multiple regions
- Implemented JWT-based authentication with role-based access control and custom middleware for secure token validation
- Wrote unit and integration tests using xUnit and Moq to ensure reliability of core API endpoints
- Communicated directly with banking clients to analyze, debug, and resolve production issues across multiple regions
- Integrated Azure Service Bus for reliable asynchronous messaging between backend microservices
- Deployed and managed backend services on Azure App Services and Azure Functions for scalable, serverless workloads

Senior Engineer I, Ticketmaster, Gurugram — *Jun 2024 - Feb 2026*

- Developed scalable backend services using .NET Core, C#, and SQL Server
- Designed and implemented REST APIs and microservices architecture for distributed, cloud-based systems
- Implemented SSO authentication using Duende Identity Server
- Improved performance through query optimization and system tuning
- Integrated observability using OpenTelemetry, Grafana, and Splunk
- Built CI/CD pipelines using GitLab with automated testing and code scanning
- Conducted code reviews to ensure high-quality standards
- Mentored and coached junior engineers on .NET best practices, debugging, and code quality standards
- Leveraged AI tools (GitHub Copilot, Claude Code) and Model Context Protocol integrations to accelerate development
- Developed SSO authentication, ticket management, and user account modules for the Ticketmaster platform
- Integrated compliance APIs for international clients

- Conducted performance testing using K6 and optimized system performance (Tech: .NET 8.0, React.js, SQL Server, AWS, Docker)
- Used LINQ and async/await patterns to streamline data access and improve API response times
- Used Kafka for event-driven data flows between distributed microservices, improving system decoupling and throughput

Product Engineer, Smart Energy Water, Noida *Sep 2022 - Jun 2024*

- Developed and maintained enterprise web applications using ASP.NET Web Forms and .NET Core
- Built and optimized backend services and APIs following Clean Code and SOLID principles, improving system efficiency by ~20%
- Reduced development effort through automation and reusable components
- Designed full-stack solutions using C#, SQL Server, JavaScript, and jQuery
- Collaborated with cross-functional teams to deliver scalable business solutions
- IntelliSmart: developed payment module with BillDesk integration and a notification system with webhook-based tracking
- Managed transaction processing and vendor integrations for IntelliSmart (Tech: .NET Core, ASP.NET Web Forms, SQL Server, Azure)
- Tata Power: implemented payment gateway integrations, automated schedulers, and prepaid/non-energy payment modules
- Enhanced Tata Power system security using JWT authentication (Tech: .NET, Angular, SQL Server, Azure)

Software Engineer, Capgemini *Jan 2020 - Sep 2022*

- Developed full-stack applications using ASP.NET MVC, .NET Core, and SQL Server
- Built REST APIs for seamless frontend-backend integration
- Debugged and resolved production issues through root-cause analysis, improving application performance
- Automated workflows using UiPath, reducing manual effort significantly
- Worked closely with business teams to deliver solutions within timelines
- Caverion (M-Files Application Team): developed document management modules for an enterprise ECM system
- Automated SAP workflows using UiPath bots, reducing manual effort from 45+ minutes to a few minutes (Tech: .NET, MVC, SQL Server, MongoDB, PostgreSQL)

EDUCATION

Master of Computer Applications (MCA) — Graphic Era University, Dehradun

2025 | CGPA / Percentage: 84%

Bachelor of Computer Applications (BCA) — Graphic Era University, Dehradun

2019 | Percentage: 83.4%

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900)
- RPA Developer Foundation
- Agile Software Development
- .NET Full Stack Training – Capgemini
